CONSERVANCY &
MUSEUM OF ART**

2022 Native Plant Seed List

The Brandywine Conservancy is offering the seeds of native plants for sale. This 43 year-old program promotes greater landscape use of our regional native plants as well as conservation of native plant populations via seed propagation of local eco-types.

The 2022 list is a result of seed collections from the Brandywine Conservancy's gardens and meadows in Chadds Ford, Pennsylvania, and from wild populations and gardens in Delaware and Chester counties. Following collection by the garden volunteers, most seeds are dried at room temperature, then cleaned and stored cold (35-40 degrees Fahrenheit). A few species are cold/moist stratified in damp vermiculite or long-fiber sphagnum moss.

Seed is available in both packets and larger quantities. Packets are \$2.00 each, or any three packets for \$5.00 (mixing and matching species is OK). Nearly all packets contain a minimum of 30 to 50 seeds. Depending on the difficulty or scarcity of collection, some packets may contain less. For the commercial grower, or wildflower meadow project, many species are available in larger quantities - a price list of these species is included. Prior to ordering from the "Large Quantity Seed List" please contact the garden office to confirm availability and to place the order. Phone (610) 388-8327 or e-mail: mgormel@brandywine.org

To order packets of seeds please use the attached order form. Send a self-addressed, stamped envelope if the number of packets ordered is five or less. For orders of 6 to 15 packages, add \$3.00 to cover postage and handling and we will provide a padded envelope.

Continue adding \$.50 for each additional increase of 5 packets (i.e., for 16 to 20 packets please add \$5.50; 21 to 25 packets would require \$7.50, etc.).

Please make checks or money orders payable to the
Brandywine Conservancy & Museum of Art and send to:

Lobelia cardinalis

More about Brandywine seed:

The seed in our program is hand collected at the optimum time from open-pollinated plants. A minimal amount of seed is collected from cultivars of native plants so that the widest range of genetic diversity can be obtained, every year.

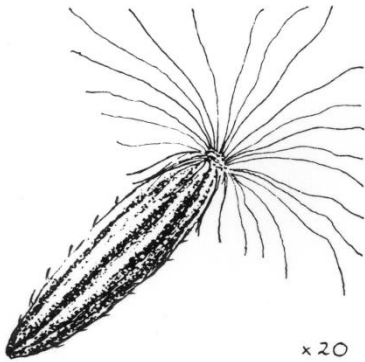

We make every effort to insure that the seed we offer for sale is as clean as possible and of the highest quality. At the time of collection, most batches contain a percentage of chaff, dirt, insects and incompletely developed seed that appears normal to the unaided eye – all along with fully mature, healthy seed.

x40

Through the use of our Clipper seed cleaning machine, which employs the combination of shaking motion, gravity, variable air flow and any two (out of 54) metal sieving screens, most collections may be separated into fractions of: miscellaneous debris, light, medium and heavy seeds. With the aid of a dissecting microscope we inspect these fractions and adjust the settings of the machine to separate out the unwanted portions. Only the highest quality seed is retained and offered for sale.

Solidago caesia

x20

Great care is taken to collect the seeds that nature designs with a pappus (the “fluff” or “parachute of hairs” attached to Aster, Goldenrod, Eupatorium seeds) at that point in time when the seeds are fully mature and ready to be released from the plant. Removing these hairs allows each batch to be cleaned more completely. Clean seeds are sown with greater ease, accuracy and efficiency and will provide a much higher percentage of seedlings from the effort. We’ve made great strides in removing these hairs and now offer most of these species “defluffed”.

Species that are on the Large Quantity List go through another process so that you may determine the actual number of seeds that you are buying. Clean seed is counted out in lots of 100, 500 or 1,000 and weighed on an electronic scale. We use the resulting weights to calculate the amount in larger quantities. Most counts are given as the number of seeds per ounce so by dividing the ounce count by 2, 4, or 8, one may determine the number of clean seed in 1/2 oz, 1/4 oz, etc.

To determine the number of actual seed in 1 gram, divide the seeds/oz by 28.35 (the number of grams in one ounce). For example, the count for *Chelone glabra* is 32,500 seeds/oz; divide that by 28.35 and you have 1,146 seeds/gram. With grasses simply remember that there are 16 ounces (oz)/pound (lb).

This unique contribution to the preservation of the environment is made possible through the dedicated efforts of the Brandywine Conservancy & Museum of Art's Volunteer Gardeners.

Please keep in mind that quantities of all seeds are limited.

For current availability phone (610) 388-8327;

2022 Seed List of Native Plants

1. *Agastache foeniculum*, Anise Hyssop GC2
2. *Allium cernuum*, Nodding Wild Onion GC2
3. *Allium tricoccum*, Ramps, Wild Leek GC2
4. *Amorpha fruticosa*, False-Indigo GC2
5. *Andropogon gerardii*, Big Bluestem GC1 or GC2
6. *Andropogon gyrans*, Elliott's Bluestem GC1 or GC2
7. *Anemone virginiana*, Thimbleweed GC2
8. *Aquilegia canadensis*, Wild Columbine GC3 & GC2
9. *Aralia racemosa*, American Spikenard GC2
10. *Asarum canadense*, Wild Ginger GC5 *LS
11. *Asclepias incarnata ssp. pulchra*, Swamp Milkweed GC2
12. *Asclepias syriaca*, Common Milkweed GC2
13. *Asclepias tuberosa*, Butterfly Weed GC2
14. *Aster cordifolius*, Heart-Leaved Aster
(*Symphiotrichum cordifolium*) GC2
15. *Aster divaricatus*, White Wood Aster
(*Eurybia divaricata*) GC2
16. *Aster novae-angliae*, New England Aster
(*Symphiotrichum novae-angliae*) GC2
17. *Aster pilosus*, Heath Aster
(*Symphiotrichum pilosum*) GC3 & GC2
18. *Baptisia australis*, Blue False Indigo GC6 & GC2
19. *Boehmeria cylindrica* – Small-Spike False Nettle GC2?
20. *Boltonia asteroides* – White Doll's Daisy GC2
21. *Calycanthus floridus*, Sweetshrub GC2
22. *Caltha palustris*, Marsh Marigold GC2
23. *Campanulastrum americanum*, American Bellflower GC1
24. *Capnoides sempervirens*, Rock Harlequin GC1/GC2?
25. *Ceanothus americanus*, New Jersey Tea GC6 & GC2
26. *Cercis canadensis*, Eastern Redbud GC6 & GC2
27. *Cephalanthus occidentalis*, Buttonbush GC1
28. *Chasmanthium latifolium*, Wild Oats GC2
29. *Chelone glabra*, White Turtlehead GC2
30. *Chionanthus virginicus*, Fringetree, GC4?
31. *Chrysopsis mariana*, Maryland Golden Aster GC2
32. *Cimicifuga racemosa* (*Actaea racemosa*), Black Cohosh, Bugbane GC4
33. *Claytonia virginica* Spring Beauty GC4
34. *Clematis virginiana*, Virgin's Bower GC2
35. *Coreopsis tripteris*, Tall Tickseed GC2
36. *Cornus amomum*, Silky Dogwood GC2
37. *Dicentra eximia*, Wild Bleeding Heart GC5 & GC4 *LS
38. *Echinacea purpurea*, Purple Coneflower GC2
39. *Elymus hystrix* (*Hystrix patula*), Bottlebrush Grass GC1 or GC2
40. *Elymus riparius*, Riverbank Wild Rye GC1 or GC2
41. *Eragrostis spectabilis*, Purple Love Grass GC3 & 1 or 2
42. *Eryngium yuccifolium*, Rattlesnake Master GC2
43. *Eupatorium coelestinum*, Mistflower
(*Conoclinium coelestinum*) GC2
44. *Eupatorium dubium* (*Eutrochium dubium*)
Joe-Pye Weed GC2
45. *Eupatorium fistulosum*, Hollow Joe-Pye Weed
(*Eutrochium fistulosum*) GC2
46. *Eupatorium perfoliatum*, Boneset GC2
47. *Euonymus americanus*, Strawberry-Bush,
Hearts-a-Burstin GC2 or GC4?
48. *Euonymus atropurpureus*, Burning Bush, Eastern Wahoo
GC2 or GC4?
49. *Geranium maculatum*, Wild Geranium GC2
50. *Helianthus decapetalus*, Thin-Leaved Sunflower GC2
51. *Heliopsis helianthoides*, Ox-Eye GC1 or GC2
52. *Heracleum maximum*, American Cow Parsnip GC2
53. *Heuchera americana*, Alumroot GC3 & GC2
54. *Heuchera villosa*, Autumn Alumroot, Hairy Alumroot
GC3&2
55. *Hibiscus moscheutos* (*Hibiscus palustris forma peckii*),
Crimson-Eyed Rose Mallow GC2
56. *Hydrastis canadensis*, Goldenseal – **avail. in July, only**
57. *Hydrophyllum canadense*, Broad Leaved Waterleaf GC2
58. *Hydrophyllum virginianum*, Virginia Waterleaf GC2
59. *Houstonia caerulea*, Bluets, Quaker Ladies GC1
60. *Iris versicolor*, Larger Blue Flag GC3 & GC2
61. *Jeffersonia diphylla*, (Twinleaf) GC5 **avail. in June, only**
62. *Laportea canadensis*, Canadian Wood Nettle GC2?
63. *Liatris spicata*, Dense Blazing Star GC1 or 2
64. *Liatris squarrosa*, Scaly Blazing Star GC1 or GC2
65. *Lobelia cardinalis*, Cardinal Flower GC3
66. *Lobelia siphilitica*, Blue Lobelia GC3
67. *Lobelia spicata*, Spiked Lobelia GC3
68. *Ludwigia alternifolia*, Seedbox GC2
69. *Magnolia virginiana*, Sweetbay Magnolia GC2
70. *Mertensia virginica*, Virginia Bluebells GC2
71. *Mimulus ringens*, Square-Stemmed Monkey-Flower
GC3 & 2
72. *Monarda fistulosa*, Wild Bergamot GC3 & 1 or GC3 & 2GC
73. *Oenothera biennis*, Evening Primrose GC3 & 1
74. *Osmorhiza longistylis*, Anise Root GC2 (see packet)
75. *Parthenocissus quinquefolia*, Virginia Creeper GC2
76. *Panicum anceps*, Beaked Panicgrass GC1 or GC2
77. *Penstemon digitalis*, Foxglove Beardtongue GC3 & GC2
78. *Penstemon hirsutus*, Hairy Beardtongue GC3 & 2
79. *Phacelia purshii*, Miami Mist GC1 (see packet)
80. *Phlox paniculata*, Garden Phlox GC2
81. *Physostegia virginiana*, False Dragonhead GC2
82. *Polemonium reptans*, Jacob's Ladder GC4
83. *Pycnanthemum tenuifolium*, Narrow-leaf Mountain Mint
GC3 & GC2
84. *Pycnanthemum virginianum*, Virginia Mountain Mint
GC3 & GC2
85. *Ratibida pinnata*, Gray-Headed Coneflower GC1 or GC2
86. *Rhexia virginica*, Virginia Meadow Beauty GC3
87. *Rudbeckia fulgida var. fulgida*, Orange Coneflower GC2
88. *Rudbeckia fulgida var. speciosa*, Showy Coneflower GC2
89. *Rudbeckia fulgida var. newmannii*,
Newmann's Coneflower GC2
90. *Rudbeckia hirta*, Black-Eyed Susan GC1
91. *Rudbeckia laciniata*, Green-Headed Coneflower GC1 or GC2
92. *Rudbeckia triloba*, Narrow-Leaved Coneflower GC1
93. *Sanguinaria canadensis*, Bloodroot GC5 **late May, only**
94. *Schizachyrium scoparium*, Little Bluestem GC1 or 2 **late fall**
95. *Scirpus cyperinus*, Wool Grass GC3 & GC2
96. *Scutellaria incana*, Downy Skullcap GC2
97. *Senna hebecarpa* (*Cassia hebecarpa*), Wild Senna GC2
98. *Sisyrinchium angustifolium*, Blue-Eyed Grass GC3&GC2
(perform twice)
99. *Solidago caesia*, Blue-Stemmed Goldenrod GC2
100. *Solidago flexicaulis*, Zigzag Goldenrod GC2
101. *Solidago juncea*, Early Goldenrod GC2

Germination Codes

Appearing at the end of each of the above species is a germination code (GC1, GC2, etc.). Some species require multiple pretreatments and are indicated with more than one code, as in GC3 & GC2.

- GC1 *Seed should germinate within 1 to 4 weeks after sowing in a warm, moist medium.* These types generally require being thoroughly air dried first and are stored under cold (35-40° F), dry conditions. No other pretreatment is necessary. Often referred to as cold, dry stratification, this is the standard storage method for all BC seed.
- GC2 *These types require cold, moist conditions prior to germinating in warm, moist conditions.* Some of these species may require only a 30-day chilling period, others might require 120 days. We typically sow these types in January, keeping them outdoors (providing approximately 90 days) and achieve good results. To simulate the outdoor treatment, mix seeds into a dampened, sterile medium (potting soil, sphagnum moss, sand, vermiculite) and place the mix into a sealed container in a cold place (35-40°F). Let it sit for 60 to 90 days, routinely checking the mixture for appropriate dampness (mixture feels damp but no water will squeeze out of a handful of the mix) then move into a warm location (65-80°F) and watch for germination. This pre-sowing treatment is often referred to as cold, moist stratification. "Twice" indicates species germinates best after repeating the treatment.
- GC3 *These seeds are very small or need light in order to break dormancy and germinate.* These should be sown on the surface of the medium and pressed into firm contact. Some growers cover these types with a light coating of very fine gravel, builders sand, swimming pool filter sand, aquarium gravel, etc. Watering from the bottom of the container, allowing the water to wick upward, will prevent very tiny seeds from being washed too deeply into the potting medium during watering.
- GC4 *These seeds require a warm, moist period followed by a cold, moist period.* Sow these species outdoors by the beginning of July and look for germination in the following year. To simulate, mix seeds into a dampened, sterile medium (potting soil, sphagnum moss, sand, vermiculite), place the mix into a sealed container in a warm place (65-80°F), let sit for 60 to 90 days, then refrigerate for another 60 to 90 days. Routinely check mixture for appropriate dampness (mixture feels damp but no water will squeeze out of a handful of the mix).
- GC5 *Sow these types immediately upon collection or following purchase.* These types will perish if allowed to dry out (or may rot if stored indoors) and are most easily handled by leaving the sown pot outdoors.
- GC6 *Hot water treatment or scarification.* Pour boiling water over the seeds and allow them to soak in the cooling water for 24 hours. Alternatively, scarify these seeds with a light sanding from medium grit sandpaper. The intention is to create small scratches in the surface of the seed coat, not to grind apart the seeds. Each is typically used in conjunction with another treatment.

***LS or *LF = Available in late spring (LS) or late-fall (LF)**
